	100mm	2438mm	1625mm
6XX15	5"	96"	64"
	125mm	2438mm	1625mm

With various lengths and widths, all fork extensions are made from high strength welded steel for safety and durability.

This construction gives them a long lifespan, even when the extensions are used regularly.

Forklift fork extensions are designed to be used when long objects or large pallets need to be lifted or moved with a forklift truck and the existing forks are not long enough to permit safe lifting.

As a safety precaution though, fork extensions must never exceed the length of the existing forks by more than 50%.

All fork lift fork extensions are supplied in pairs and each pair includes a steel retaining strap, which is to prevent slippage during use. The forks are a powder coated yellow finish.
